Skills

Programming Languages:

C#, Python, Java, VHDL

Web Development: HTML,

CSS, JavaScript, PHP

Databases: MySQL,

PostgreSQL

Version Control: Git,

GitHub

Development Tools: Visual

Studio, IntelliJ IDEA,

PyCharm

Testing: Basic

understanding of unit

testing (e.g. JUnit)

Languages

English

Romanian

French

Raul-Constantin Raulea

Summary

I'm a Computer Science student with practical experience as an intern engineer, eager to apply my programming knowledge to real-world projects and grow through teamwork and problem-solving.

Work Experience

Junior Engineer, Aumovio (Internship), Sibiu

August 2025 - Present

- Experience in executing manual and automated testing techniques to ensure software quality.
- Skills in using tools such as JIRA, CANoe, DOORS

Summer practice, Ropardo, Sibiu

July 2025

- Created an Expense Tracker web application for managing your incomes and expenses, with a variety of statistics.
- Technologies used: .NET framework(Blazor), Entity Frameworks, PostgreSQL

Education

Computer Science, University Lucian Blaga of Sibiu

2022 - Present

Relevant courses:

- Object-Oriented Programming
- Software Engineering
- Artificial Intelligence
- Operating Systems
- Computer Networks
- Data Bases

Natural Sciences-Bilingual-English, National College Octavian

Goga Sibiu

2018 - 2022

Room Booking Web Application

2024 - 2025

- Full-stack web application where you can book rooms as a student and list apartments as a host, managing CRUD operations, user profiles, user groups and administrative moderation.
- Engineered using Layered Architecture, SOLID principles, and Role-Based Authentication with Java(Glassfish Server) and MySQL.

Information Retrieval Engine

2024 - 2025

- Developed a search and retrieval engine in C# for the Reuters XML news dataset.
- Implemented full-text preprocessing (tokenization, lemmatization) and Information Retrieval (IR) techniques to rank articles efficiently based on user queries.

Didactic Microprocessor Simulator

2024 - 2025

- Designed and implemented a real-time CPU microarchitecture simulator in C# (Windows Forms).
- Accurately models the full instruction cycle (fetch-decode-execute) with visualization of register/memory states, enhancing education in computer architecture.
- [Java Intermediate - Sololearn](#)
- [Google AI Essentials - Coursera](#)
- ECDL: Computer essentials: Word processing; Spreadsheets; Online essentials; Presentation; Using databases

Hobbies

- Painting
- Padel
- Fitness
